Keeve,

I'm going to focus on challenges to IRIS in my talk (i.e., need for higher throughput of assessments and implementation of systematic review)and steps we are taking with new leadership to address.

Here are some background materials:

- The 3 attached InsideEPA and BNA reports that highlight current challenges to IRIS
- NRC 2014 report "[Review of EPA's Integrated Risk Information System \(IRIS\) Process](#)" (students can download pdf for free, a browse should be fine for context for my talk)
- <http://www.gao.gov/assets/690/682765.pdf> (a 600+ page report that summarizes GAO review of many programs in addition to IRIS, students should do a document search for "IRIS")

Does this seem okay?
